## Our NHS and Social Care in Crisis

This is a campaigners' conference to update and share information and experience from the fight to defend our NHS against cash-driven cuts and privatisation.

Most of the conference time will be workshop discussion on a range of topics including: Working with local government; Building alliances; Defending rural health care; Fighting for mental health services; Building campaigns for social care; Challenging STPs/CEPs/ACs/ACOs – what works? Fighting for safe staffing and safe services; Fighting privatisation; The Naylor Review and the great land grab; Reversing Lansley's Health & Social Care Act; Raising the pressure to bust the cap on NHS pay. Working with trade unions and health workers. Campaigning for democracy and accountability in health care.

Conference information packs for every delegate: share and learn from local campaigns across the country: Join the coalition of forces determined to defend and restore #ourNHS. Theresa May's government has no mandate for cuts and privatisation: let's make sure plans that lead to these are stopped, dropped and abandoned.
